

The Ladder of Learning

V I D E O S

These videos clearly show the important rungs up the Ladder of Learning to Integration, which is the launching pad for the rocket of academic learning.

For the first time, parents and teachers can see these vital stages of early childhood development and understand their significance for achievement at school.

Starring a delightful caste of children from babies to four year olds, these five videos aim at academic achievement for all children, through an understanding of the foundations for learning established during early childhood.
